

HARSHA KARTHIKEYAN

SOFTWARE ENGINEER

☎ +44 7393 097782 | ✉ harshakarthikeyan00@gmail.com | 📍 Warwick, United Kingdom | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

.NET Developer with **4 years** of experience building and supporting healthcare SaaS platforms, most recently a notification platform processing 30M+ notifications a year. Specialist in **C#/.NET 8, ASP.NET Core, SQL Server**, designing **REST APIs, microservices and event-driven systems on Azure**, with working experience in **Angular**. Stepped up to **lead technical delivery for two Lines of Business**, delivering every release on its planned date.

TECHNICAL SKILLS

Languages: C#, SQL, TypeScript, JavaScript

Frameworks: .NET 8, ASP.NET Core, Entity Framework Core, Web API, Angular, LINQ

Cloud & DevOps: Microsoft Azure (App Services, Web Jobs, File Storage, Application Insights), Azure DevOps CI/CD

Database & Messaging: Microsoft SQL Server, Kafka

Development Practices & Tools: Agile, Scrum, Git, GitHub Copilot, Postman, Swagger, JIRA

Architecture: OOP, SOLID Principles, REST APIs, Microservices, Multi-tenancy, Dependency Injection, JWT, Caching

Testing: Unit Testing, TDD, xUnit

PROFESSIONAL EXPERIENCE

Optum

Jul 2022 - Jun 2026

Primary Project: Notification Generation System (NGS): a healthcare SaaS platform automating member communications in a regulated environment with audit requirements, processing 30M+ notifications a year across 10+ Lines of Business.

Software Engineer

Mar 2024 - Jun 2026

- **Led technical delivery for two Lines of Business**, owning solution design, estimation and code review, working with US-based stakeholders, and delivering every release on its planned date.
- Onboarded both Lines of Business onto the platform, handling **250K+ notifications weekly** for **3,000+ concurrent users** and saving **~\$200K for the business**.
- Automated the manual intake process for **7K-10K letters a day**, saving 5-8 minutes of manual effort per letter.
- Migrated **40 Kafka topics across 4 environments to Confluent Cloud** (ACLs, certificate-based authentication) with **zero messages lost**.
- Delivered application changes for the **migration from Windows VMs to Azure**, consolidating 7 LOB configuration databases into a **single multi-tenant database**, reducing Azure infrastructure cost.
- Monitored applications and resolved production incidents using Application Insights.

Associate Software Engineer II

Jul 2023 - Mar 2024

- **Built ASP.NET Core REST APIs** in C#, EF Core and SQL Server using SOLID principles and Dependency Injection, and integrated them with **Angular** front-end components.
- Upgraded 36 background projects from **.NET 6 to .NET 8**, replacing unsupported libraries like iTextSharp.
- Onboarded a new Line of Business through configuration-driven enhancements and Kafka and API integrations.
- Wrote **xUnit** unit tests for every user story and supported integration testing.

Technology Development Program (TDP) II

Jul 2022 - Jul 2023

- *Appeals & Grievance Tracking System (Jul - Nov 2022):* Built REST APIs, integrated them with **Angular user interfaces**, and maintained **stored procedures**.
- *NGS (Nov 2022 - Jul 2023):* Developed API and SQL features, and **.NET background jobs** for letter processing.

EDUCATION

Bachelor of Technology - Electronics and Instrumentation Engineering
SASTRA University | First class with distinction

Jul 2018 - Jul 2022

ADDITIONAL INFORMATION

Certifications: Microsoft AZ-900, Generative AI (AI Dojo), UnitedHealthcare M&R Certification, AHIP AHM 250

Award: M&R Technology Impact Award (2023)
